WHAT IS FOREX TRADING

Forex trading is the buying and selling of currencies, also known as foreign exchange (FX) trading. It's the world's largest financial market, with trillions of dollars traded daily. Forex trading involves simultaneously buying one currency while selling another in hopes of profiting from changes in their relative values. For example, if you think the euro will strengthen against the U.S. dollar, you might buy euros and sell dollars, aiming to sell those euros later at a higher price.

WHAT IS STOCK MARKET

The stock market is a set of exchanges where companies issue shares and other securities for trading. It also includes over-the-counter (OTC) marketplaces where investors trade securities directly with each other (rather than through an exchange). Definition. Short selling is a trading strategy in which a trader aims to profit from a decline in a security's price by borrowing shares and selling them, hoping the stock price will then fall, enabling them to purchase the shares back for less money. Stock is a share of ownership in a company. It gives the owner a claim on the company's assets and earnings. The value of a stock rises and falls along with the company's value.
